

ADDENDUM NO. 2

MOSHER SPRINGS WATERLINE IMPROVEMENT PROJECT, PHASE TWO

Zancanella & Associates Project No. 93503.85

15 May 2018

TO ALL PROSPECTIVE BIDDERS:

The following revisions have been developed to aid potential bidders in the preparation of their formal bid documents. Contents of this Addendum No. 2 supersede previously issued contract drawings, specifications and addenda, additions or deletions only insofar as specifically stated herein. All other portions of those documents remain in full force and effect.

This Addendum No. 2 consists of the following four (4) items:

1. A revised bid schedule is attached. Items have been revised and/or added as discussed below.
2. Additional Eagle County Info:
 - a. As noted in the Special Conditions, work within the road shall comply with Eagle County Regulations: CHAPTER V REGULATIONS FOR CONSTRUCTION WITHIN THE PUBLIC WAY OF EAGLE COUNTY. Therefore, backfill material called out as select material shall meet paragraph 5.36.04.3, which is 8" minus except within the top foot, which is 3" minus. An item has been added to the Bid Schedule for 1000 cubic yards of select import to establish a unit price if needed.
 - b. The County's intent for base course is to have the contractor purchase and deliver the base course material. The County will then be responsible for blade placement, rolling, and mag chloride finish. This item has been added to the Bid Schedule as "4000 tons of "virgin ¾ spec base" delivered from the Gypsum Pit. (The quantity is calculated to cover the entire road for the length of the project, 20 feet wide.) The contractor will need to coordinate the placement of this material after the pipeline has been installed.
3. The main bid schedule will only include Ductile Iron Pipe. Two alternate bid sections have been added, one for HDPE and one for C900 PVC.
4. Item 5, in Addendum #1 should now refer to Bid Item 12 on the attached bid schedule.
